

MATERIALS

- Self-retracting tape measure
- Blue painter tape (or duct tape)

INSTRUCTIONS

- Find the point that is approximately equally distant from the 4 screens and draw an X on the floor with blue painter tape.
- Using the tape measure, measure the distance (in inches) from the X to each of the screens (A, B, C and D) and record it in the boxes above.
- Using the tape measure, measure the distance (in inches) from the left edge of each of the screens to the wall to their left.
- Finally, using the tape measure, measure the width (in inches) of each of the screens and record it in the box here.
